

# LIFESTYLE

## MONITORING SOFTWARE

*Brought to you by Group 18 – CC02*

A simple interactive mobile software project for personal finance, health and time management. Keeping you happy and healthy in the most simple & exciting way – our one and core mission

Android Mobile Platform

React Native Framework

Biometric Integration

Storage Synchronization

Push Notifications

MVC Architecture

### MANAGE EVERY LIFE ASPECT

Record, Review, and Realize your lifestyle via finance, exercising, nutritional and schedule management

Daily reminder service along with express tracking keeps you on track with maintaining a stable and safe living habit

### SMART ADVICE & SUGGESTIONS

Experience the rapid advice service with spot-on summary, reviews, warnings and even some useful tips everyday

Explore various cuisine/ workout suggestions that may significantly improve your awareness

### FRIENDLY USER INTERFACE

Wander around the app's amiable theme, and Marvel at the colorful charts, graphs and suggestions made only for you!

Abundant images and icons (customizable on your own) shall figuratively visualize your experience

### DIVERSE OPTIONS & SECURITY

Easily customizable graphical and personal settings to create a mobile environment that feels like your home

Multilayer security with various options ranging from passwords, patterns to compatible fingerprint scanner

### WHAT MORE FOR THE FUTURE?

This project is still under development!

- *Online server*
- *Document Exportation*
- *Advanced Time-based Analysis*
- *Detailed Suggestions with more Interactions*
